

## LIST OF CONTENTS

### VOLUME 45

#### NUMBER 1

- |  |            |  |
|--|------------|--|
| <b>R. G. McGarvey and T. M. Cavalier</b>       | <b>1</b>   | A global optimal approach to facility location in the presence of forbidden regions                            |
| <b>M. Ghiassi and C. Spera</b>                 | <b>17</b>  | Defining the Internet-based supply chain system for mass customized markets                                    |
| <b>J.-F. Chen</b>                              | <b>43</b>  | Component allocation in multi-echelon assembly systems with linked substitutes                                 |
| <b>C. S. Lee, S. S. Kim and J. S. Choi</b>     | <b>61</b>  | Operation sequence and tool selection in flexible manufacturing systems under dynamic tool allocation          |
| <b>M. Aldaihani and M. M. Dessouky</b>         | <b>75</b>  | Hybrid scheduling methods for paratransit operations   |
| <b>Y. Orito, H. Yamamoto and G. Yamazaki</b>   | <b>97</b>  | Index fund selections with genetic algorithms and heuristic classifications                                    |
| <b>J. Zhou and B. Liu</b>                      | <b>111</b> | New stochastic models for capacitated location-allocation problem  |
| <b>B.-S. Min and D.-W. Tcha</b>                | <b>127</b> | On stacking bi-directional self-healing-rings on a conduit ring  |
| <b>Y. J. Son, A. T. Jones and R. A. Wysk</b>   | <b>141</b> | Component based simulation modeling from neutral component libraries   |
| <b>D. L. Shunk, J.-I. Kim and H. Y. Nam</b>    | <b>167</b> | The application of an integrated enterprise modeling methodology — FIDO — to supply chain integration modeling |
| <b>J. C.-Y. Su, S.-J. (G.) Chen and L. Lin</b> | <b>195</b> | A structured approach to measuring functional dependency and sequencing of coupled tasks in engineering design |
| <b>A. Lengyel, I. Hatono and K. Ueda</b>       | <b>215</b> | Scheduling for on-time completion in job shops using feasibility function                                      |
| <b>M. D. Rossetti and K. J. A. Stanford</b>    | <b>231</b> | Group sequencing a PCB assembly system via an expected sequence dependent setup heuristic                      |

#### NUMBER 2

- |                   |            |         |
|-------------------|------------|---------|
| <b>S. M. Waly</b> | <b>255</b> | Preface |
|-------------------|------------|---------|

- M. Azizoglu, S. Kondakci and M. Köksalan** 257 Single machine scheduling with maximum earliness and number tardy
- S. Myint** 269 A framework of an intelligent quality function deployment (IQFD) for discrete assembly environment
- E. R. Coates and M. E. Kuhl** 285 Using simulation software to solve engineering economy problems
- B. Ghahramani** 295 Software reliability analysis: a systems development model
- P. Cowling** 307 A flexible decision support system for steel hot rolling mill scheduling
- R. Javadpour and G. M. Knapp** 323 A fuzzy neural network approach to machine condition monitoring
- G. A. Süer, R. Vazquez and J. Santos** 331 Evolutionary programming for minimizing the average flow time in the presence of non-zero ready times

### NUMBER 3

- C. Chiplunkar, S. G. Deshmukh and R. Chattopadhyay** 347 Application of principles of event related open systems to business process reengineering
- F.-Y. Ding and R. Tolani** 375 Production planning to support mixed-model assembly
- R. J. Gagnon and C. Sheu** 393 Acquiring advanced engineering technologies under conditions of performance improvement
- Y.-K. Lin and J. Yuan** 417 Flow reliability of a probabilistic capacitated-flow network in multiple node pairs case
- R. Linn, J.-y. Liu, Y.-w. Wan, C. Zhang and K. G. Murty** 429 Rubber tired gantry crane deployment for container yard operation
- B. Mondal, A. K. Bhunia and M. Maiti** 443 An inventory system of ameliorating items for price dependent demand rate
- J. Shin, S. Park, C. Ju and H. Cho** 457 CORBA-based integration framework for distributed shop floor control
- M. T. Todinov** 475 Minimum failure-free operating intervals associated with random failures of non-repairable components
- I. H. Toroslu** 493 Personnel assignment problem with hierarchical ordering constraints
- C. C. Yang and V. N. A. Naikan** 511 Optimum tolerance design for complex assemblies using hierarchical interval constraint networks

### NUMBER 4

- A. R. Clark** 545 Hybrid heuristics for planning lot setups and sizes

<b>A. A. Shikdar and N. M. Sawaqed</b>	<b>563</b>	Worker productivity, and occupational health and safety issues in selected industries
<b>R. Spina, L. M. Galantucci and M. Dassisti</b>	<b>573</b>	A hybrid approach to the single line scheduling problem with multiple products and sequence-dependent time
<b>J. M. Usher</b>	<b>585</b>	Evaluating the impact of alternative plans on manufacturing performance
<b>B. J. Park, H. R. Choi and H. S. Kim</b>	<b>597</b>	A hybrid genetic algorithm for the job shop scheduling problems
<b>Y.-F. Hung, C.-P. Chen, C.-C. Shih and M.-H. Hung</b>	<b>615</b>	Using tabu search with ranking candidate list to solve production planning problems with setups
<b>I. H. Osman, B. Al-Ayoubi and M. Barake</b>	<b>635</b>	A greedy random adaptive search procedure for the weighted maximal planar graph problem
<b>U. Purintrapiban and V. Kachitvichyanukul</b>	<b>653</b>	Detecting patterns in process data with fractal dimension
<b>S. G. Ponnambalam, P. Aravindan and M. S. Rao</b>	<b>669</b>	Genetic algorithms for sequencing problems in mixed model assembly lines
<b>D. Ridley</b>	<b>691</b>	The univariate moving window spectral method
<b>S. Zolfaghari and M. Liang</b>	<b>713</b>	A new genetic algorithm for the machine/part grouping problem involving processing times and lot sizes
	<b>733</b>	Volume Contents
	<b>737</b>	Author Index

**Vol. 45**

**Iss. 1**

**JUN**

**2003**
